

Innuos PhoenixUSB Reclocker

Innuos launches the new PhoenixUSB Reclocker at RMAF

Take the USB signal from any source and completely regenerate it to an extremely high-precision signal into your DAC, allowing it to perform at its best.

The PhoenixUSB offers in one unit the equivalent of 3 separate components: A USB regenerator, a linear power supply and an external master clock with its own linear power supply.

Innuos applied 3 main design approaches learning from their experience with the Innuos flagship music server, the STATEMENT:

- The USB chip regenerating the signal contains no switching regulators. All 3 independent voltages to the chip originate from an independent linear power supply with further regulation provided by 3 sets of LT3045 regulators.
- The use of a 3ppb OCXO clock running directly at 24MHz and connected via a board track just a couple of inches away from the USB chip. Therefore, no precision is lost within cables and connectors, as is the case when using an external master 10MHz clock with an additional 24MHz clock generator.

- Two independent Statement-level linear power supplies, one dedicated to the OCXO clock and the other used for powering the USB chip/5V USB line.

The PhoenixUSB's world premier will be at RMAF in Suite 3142 where Innuos will partner with renowned local Colorado brands YG, Ayre and Boulder for a top of the class system. Cables and Power Conditioner will be provided by Audioquest. Visitors will be able to experience the upgrade in sound quality the PhoenixUSB can bring to a source component through A/B demos done by the Innuos team. Retail pricing of the new PhoenixUSB Reclocker will be \$3,149 USD, \$4,099 CAD, €2,499 Eur, £2,249 GBP.

All ZEN Mk3 series models as well as the STATEMENT will be available in Suite 3142.

SUITE 3142

MAIN ROOM

- Innuos STATEMENT*
- Innuos ZENith Mk3* and NEW Innuos PhoenixUSB Reclocker
- YG Acoustics - Vantage™ Speakers
- Boulder Amplifiers – 1161 Stereo Power Amplifier
- Ayre Acoustics – QX-5 Twenty Dac
- Audioquest – Cables and Power Conditioner
- GIK Acoustics – Impression Series Acoustic Panels and Bass Traps
- SGR – High End Model V, Symphony HiFi Rack
- *Systems playing interchangeably throughout the show

SECOND ROOM

- Innuos ZEN Series
- Schiit Audio – Ragnarok 2 Amp & Bifrost DACs
- ZMF Headphones – The Verite

ALSO LISTEN TO INNUOS SYSTEMS AT:

- NVS Sound (Suite 8153) – STATEMENT & ZENith Mk3
- Vinnie Rossi (Room 5125) – STATEMENT
- ZMF Headphones (Headspace 78) – ZENmini Mk3
